TUCSIN has forty years experience in assisting students who want to pursue tertiary education, but were failed by the system. They had the ability, but could not get the required grades to proceed onto tertiary education. The reasons are many, but pursuing them at this time is futile. What is important is that Tucsin has helped many a professional, including entrepreneurs, academics, politicians, doctors, lawyers and teachers to achieve their dreams and be of great value to Namibia. And we are still leading the field in this area.

This will be confirmed by tertiary institutions in Namibia who welcome Tucsin students as they are known for their dedication and hard work. You can also see our results at the end of the year.

Over the past few years Tucsin has consistently been placed in the Top Ten in the grade 12 examinations, competing with the top schools in the country.

Pupils who are interested in pursuing higher education but do not have the required grades can enroll at one of our centres to improve their grades in order to qualify for the courses they would like to pursue. You can register for NSSCO or NSSCH in selective subjects at our campus at 16 Mont Blanc Street, Eros Windhoek. NSSCO is also offered at our other campuses:

Khomasdal, Oshakati and Rundu. Dedicated pupils can improve their grades with up to four symbols. The reasons for our success are the discipline we apply, the dedication of our teachers and the many hours of contact time between teacher and pupil. We have intensive face-to-face classes for 5 hours per week for NSSCO (ordinary level) and 9 hours for NSSCH (higher level). Our teachers receive rewards every year and the top achievement in the country in a subject is not an uncommon reward.

Tucsin is a non-profit organisation and if there are any surpluses at the end of the year, it is reinvested in our activities.

People often say we are expensive, but if you consider the contact time with teachers, you will understand why our fees are higher than other upgrading institutions. Quality is not cheap.

We offer the following subjects at NSSCO level (subject to demand): mathematics (core and extended level); English as a second language (core and ext level); physical science; biology; geography; development studies. Our entrance requirements for NSSCO are: Pupils registering for mathematics and English at extended level should have gained at least a D in their previous Grade 12 exams.

We offer the following subjects at NSSCH level: mathematics, biology and physical science and our entrance requirements are: U symbol at higher level or a B symbol at ordinary level in the NSSC Grade 12 examinations, and passing a Higher Level Entrance Test for physical science, mathematics and biology.

APPLICATION AND REGISTRATION:

Application forms will be available at all 4 centres as from mid-November 2019. Registration usually takes place in January, when the national final examination results are released.
